Professional Profile

Computer Science student with growing expertise in **AI/ML**, **Cybersecurity**, **Data science** and **Software Engineering**. Hands-on experience in system setup, ICT troubleshooting, and digital training. Proven innovator — selected for national science exhibitions, global nominee at NASA Space Apps Challenge 2025, and finalist in UCC National cybersecurity competition 2025. Combines technical skills with strong community engagement, documentation, and pressure-tested field work. Seeks a mindful, growth-oriented environment to deliver impact through technology and collaboration.

Experience

National Social Security Fund (NSSF)

Intern

06/2026 – 09/2026

I undertook my internship at the National Social Security Fund of Uganda (NSSF) in the Technology & Enterprise Solutions (TES) Department.

Amazon Web Services (AWS)

AWS Student Builder Group Leader -Lira University

09/2026 – Present | Lira ,Uganda

Zindi Africa Data Science ,AI/ML

Zindi Community & Campus Ambassador

Present | Lira,Uganda

NASA Space Apps Challenge 2025

Technical Project Developer

Built apps addressing Earth/space challenges using NASA data via APIs

Electoral Commission Uganda

Biometrics Machine IT support

2026 General Elections.

UBOS (National Population & Housing Census)

Census Enumerator

07/2023 – 09/2023 | Buhuka

- Conducted enumeration and community mobilization in hard-to-reach communities (Buhuka)
- Worked independently under minimal supervision with high accuracy

Kagoma Youth Center / Windle International Uganda

ICT Support Assistant / Trainer

03/2021 – 08/2021

- Trained community members in digital tools and ICT literacy
- Delivered hardware/software support and maintained ICT equipment
- Simplified complex technical concepts for non-technical users

CIYOTA Kyangwali

Volunteer / Field Assistant

- Supported field data collection, registration, and community mobilization
- Demonstrated reliability under pressure in demanding conditions

Technical Skills

Languages & Stack

Java, Python, HTML, CSS, JavaScript, React JS, MySQL, PHP, C++, Jupyter notebooks, GitHub, Streamlit.

Core Technical

AI & Data Science Fundamentals, Software Engineering, Web Design & Development, Graphics & UI/UX Design, Data Analysis, Database Management, Networking (LAN/WLAN), OS Installation (Windows/Linux), ICT User Support, Digital Data Entry, Biometric/Electronic Devices, Cybersecurity Awareness, Problem-Solving, Digital Forensics

Soft Skills

Attention to Detail, Communication & Presentation, Teamwork, High Integrity & Confidentiality, Time Management, Analytical, Documentation, Professionalism, Adaptability

Power BI

Data Visualization, Storytelling & interactive Reporting

SPSS Data Analytics

Data Analytics

Languages

English

Swahili

Runyakitara

Luganda

Kinyarwanda

Rukiga

Education

B.Sc. in Computer Science (Year 3)

Lira University

08/2024 – Present | Lira City, Northern Uganda

Currently pursuing my 3rd and final year of my Bsc.

Computer Science Course at Lira University

UACE Certificate

St. Andrea Kaahwa's College Hoima

03/2022 – 11/2023 | Hoima City, Uganda

A-Level Education

UCE Certificate

St. Andrea Kaahwa's College Hoima

02/2017 – 10/2021

O-level Education

PLE Passlip

Step By Step P/S Hoima

02/2009 – 10/2016

Primary Education

Certifications & Courses

ICDL Cybersecurity Certified

ICDL / MTN ACE Uganda

ICDL International Computer Driving License

Galactic Problem Solver – NASA Space Apps Challenge 2025

CCNA (in progress) – Cisco Networking Academy

Soft Skills Certificate – Brighter Monday Uganda

Coachability Certificate – Alight International / Griffin Works

Computer Training Certificate – Windle International Uganda / UNHCR

Certificate in Community Technology

Paralegal Advisory & Counselling Certificate

Refugee Law Project

Certificate in Computer Basics & Online Essentials (Microsoft Office)

MTN ACE Digital Skilling Program

Power BI- Build with Microsoft Power BI

From Microsoft Learn.

IBM - Python for Data science

From IBM Skills Build

Discover Data Analytics

From Microsoft

Prompt Engineering

From Free Academy.ai

A/B Testing

Cursa Academy

Leadership

Current Leadership Roles

- AWS Student Builder Group Leader -Lira University
- Zindi Data Science, AI/ML Community & Campus Ambassador
- Technical Lead- Campus Developer Network (CDN)
- Vice President – Lira University Association of Computing (LUAC)
- Faculty of Computing Representative – St. Luke Catholic Chaplaincy, Lira University

- Publicity & Communications Manager – Banyakitara Lira University Cultural Students Association (BALUSA)

Past Leadership Roles

- Junior ICT Student Assistant – St. Andrea Kaahwa's College Hoima (A-Level)
- Refugee Student Scholar Ambassador – CIYOTA, Kyangwali Refugee Camp

Career Objective

To apply my expertise in computer science, digital innovation, and AI toward meaningful solutions in a professional environment that values mindfulness, collaboration, and continuous growth. I aim to deliver high-quality, thoughtful work with emotional intelligence and resilience — driving positive impact while growing as a balanced professional.

Additional Work

Projects & Contributions

- Tech_Lyf Inc founder providing Refugee tailored digital solutions and bringing all tech domains together to contribute to Refugee support in all fields.
- Vehicle rental system design
- Flyers, brochures, adverts for organizations/individuals
- Open source UI/UX contributions
- Currently building: robotic designs + AI systems for Ugandan language translations
- Computer system installation & configuration
- Data management & backup projects
- ICT & digital literacy training workshops

Featured Projects & Achievements

Cyberstars 2025 – UCC National Cybersecurity Competition

Team of 3

- ✓ Finalist – Competed in reverse engineering, digital forensics, network security, ethical hacking, and penetration testing.

Yield Vault 360

Team Lead

AI-integrated smart farming app with virtual global farm tours.

- ✓ Selected for NCHE 2026 National Science Exhibition (Gulu)
- ✓ Also exhibited at Lira University Internal Science Exhibition

Orbit Ops AI

Team Project – NASA Space Apps Challenge 2025
AI-powered platform with built-in advisor to help students, engineers, and tech enthusiasts build space apps.

- ✓ Declared Global Nominee – NASA Space Apps Challenge 2025

Ocean Pulse

Built solo – NASA Space Apps Challenge 2025
Web platform using NASA's real-time data to study ocean health via games, quizzes, and stories.

- ✓ Galactic Problem Solver Certificate – NASA

Daktiva

Team Project

Online gig platform connecting doctors with patients for medical services and booking.

- ✓ Exhibited at NCHE National Exhibition (Gulu) & Lira University

STI Satellite Demonstration Project – Kiruhura (EDic)

Selected by Science Technology & Innovation (STI) Uganda to explore space science solutions; ongoing online collaboration with universities.

SPSS Research Analytics

Final year students Chapter 4 analytics
Data Analytics for Chapter 4 of various students at Lira University.

Financial Intelligence AI Model

Built with Microsoft Financial Dataset
A Financial Sales prediction model built using Microsoft Financial Sales dataset.

Interests

- Photography
- Video games
- Tech evolution
- Reading novels
- Poetry
- Nature & Wild life Adventure
- Programming & hacks
- Animation & Toon Production
